YOUR PROJECT BRIEF

Your manager asks one question.
You open twelve sheets.

Raw numbers, no chart, #DIV/0!. A dashboard answers the monthly questions in one minute, on one page. This file shows you my way of working, lets you choose a design and tells me what you need. Fill it in a few minutes, save it and send it back to me.

After · my way

My tip: Keep raw data and reports on separate sheets.

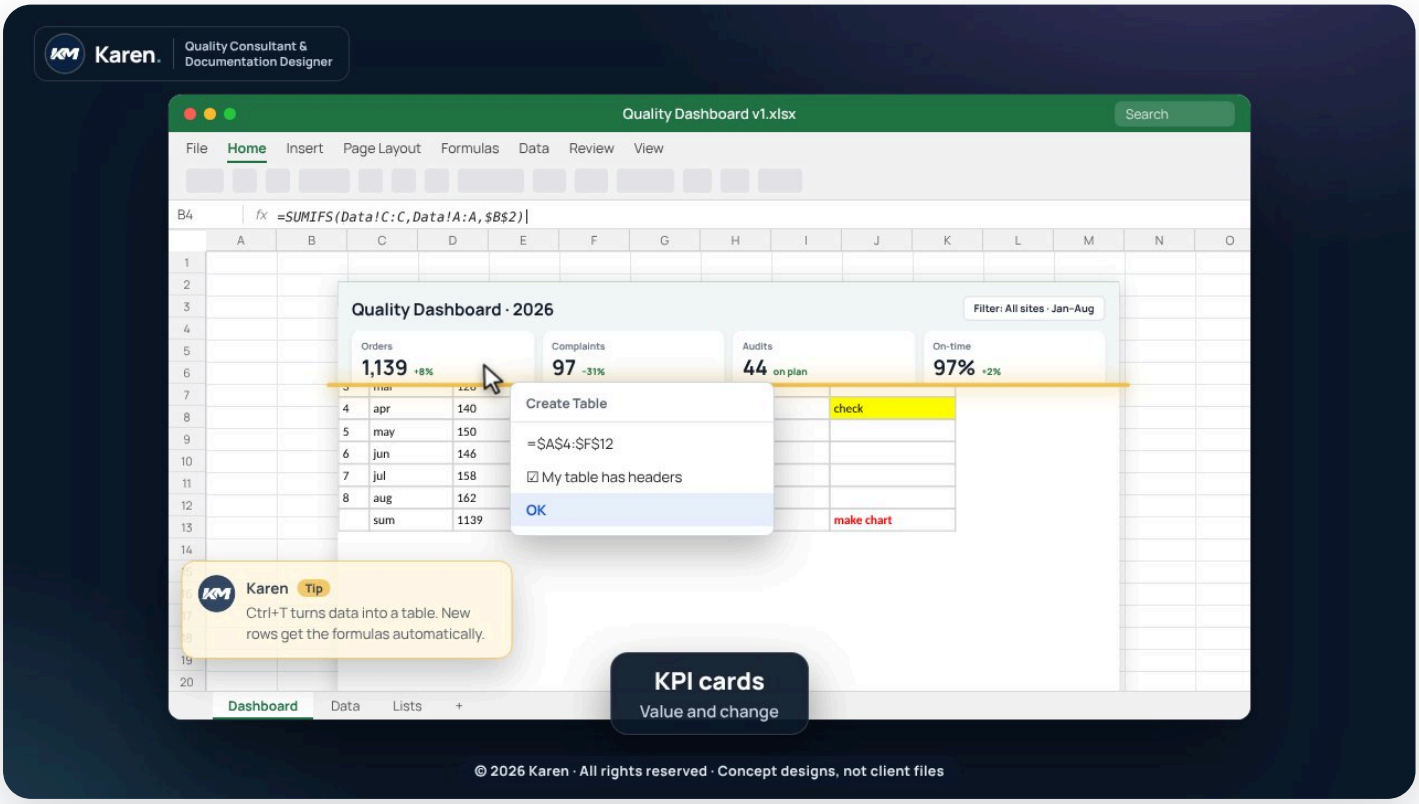

Paste new data at the bottom of one clean table, and let the dashboard read from it. You never touch the charts again.

HOW I WORK ON YOUR FILE

By hand, *step by step.*

A moment from my work on a file like yours. I build everything on the program's own tools, so the file stays easy for you to edit later.

Two things I do on every file

Tables, not ranges

Ctrl+T turns data into a table. New rows get the formulas and formatting automatically.

Drop-down lists

Data Validation makes a drop-down list that stops typing mistakes before they happen.

Before I send it

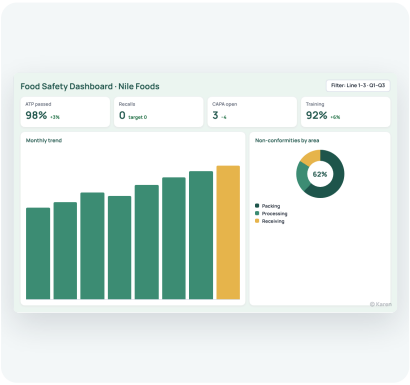

- **Content and numbers** — Checked against your file
- **Design and formatting** — Same fonts, colours and spacing
- **The final file** — Opened once more, saved as PDF too
