YOUR PROJECT BRIEF

Your sheet has the data.
It just can't tell you anything.

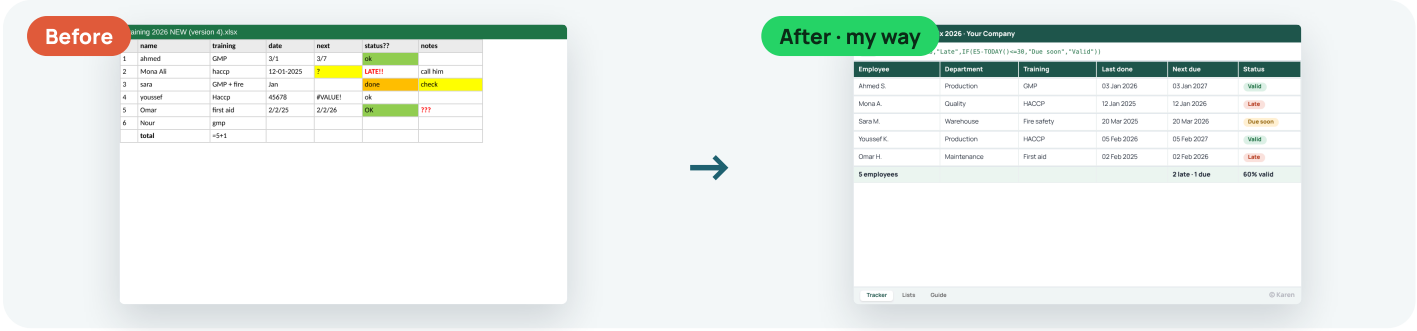

Typed totals, random colours, #VALUE! errors, dates in five formats. You spend more time fixing the sheet than using it. This file shows you my way of working, lets you choose a design and tells me what you need. Fill it in a few minutes, save it and send it back to me.

What you get

- **Excel + Google Sheets** — Tested in both
- **Automatic status and alerts** — Late, due soon, valid
- **Drop-downs and protection** — Clean data, locked formulas
- **A short guide tab** — Use and update it yourself
- **Your colours and logo** — Looks like your company
- **2 weeks of free revisions** — Confidential, always

How it works

1. **Fill pages 3 and 4** — Pick a design and answer a few questions
2. **Send it back** — By email or in our chat
3. **Fixed price and time** — I reply myself within 15–30 minutes
4. **We start** — Source files, checked 3 times

My tip: Never type a number inside a formula.

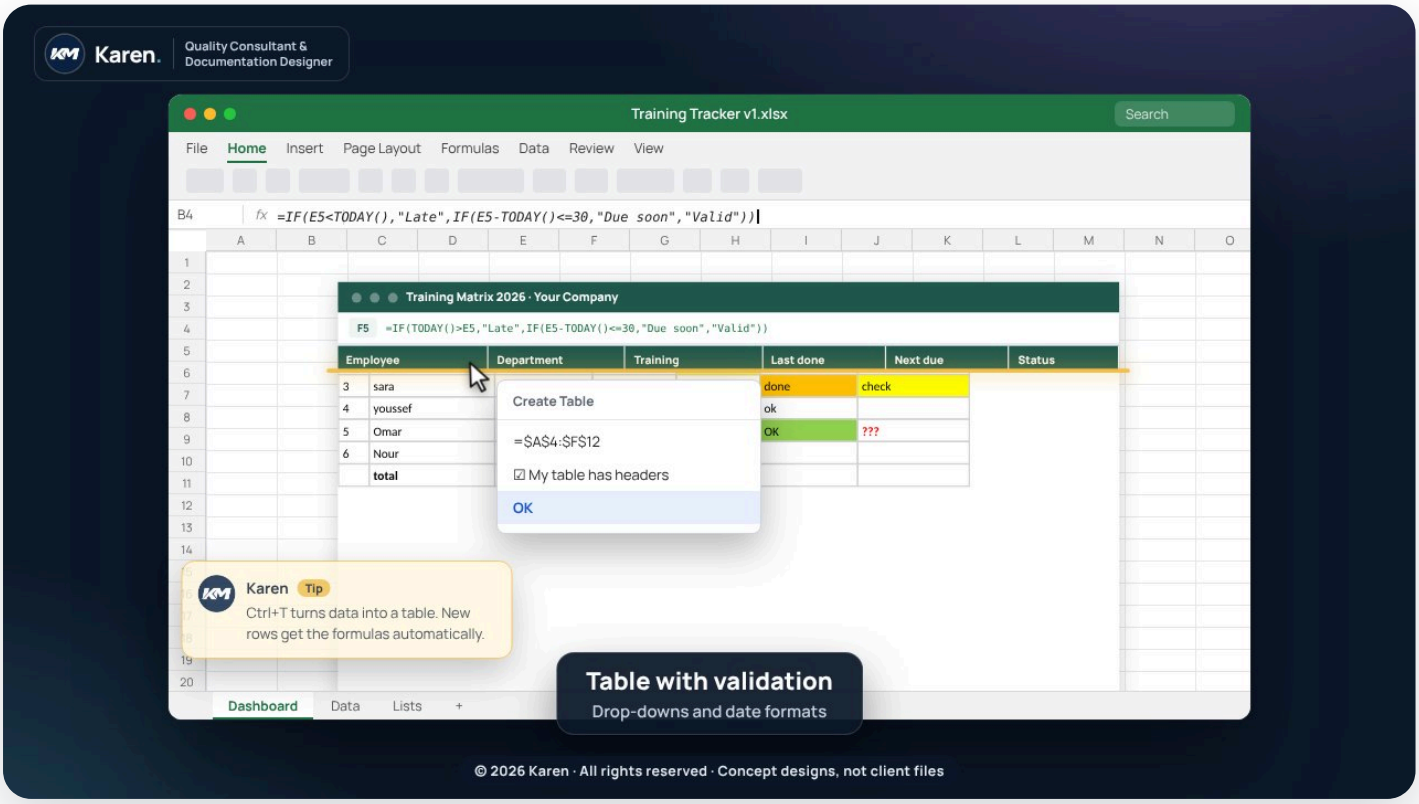

Put limits and dates in their own cells and point the formula to them. When the limit changes, you change one cell, and the whole sheet stays right.

HOW I WORK ON YOUR FILE

By hand, *step by step.*

A moment from my work on a file like yours. I build everything on the program's own tools, so the file stays easy for you to edit later.

Two things I do on every file

Tables, not ranges

Ctrl+T turns data into a table. New rows get the formulas and formatting automatically.

Drop-down lists

Data Validation makes a drop-down list that stops typing mistakes before they happen.

Before I send it

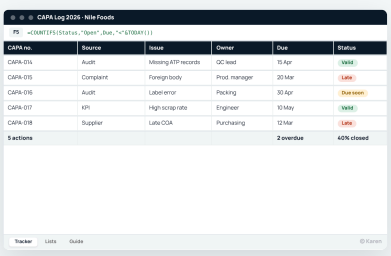

- **Content and numbers** — Checked against your file
- **Design and formatting** — Same fonts, colours and spacing
- **The final file** — Opened once more, saved as PDF too
